

The FairClimateFund

Neera van der Geest

Utrecht 2009

CO2-footprint per person in a year for a number of countries

Principle: Equal sharing of a sustainable use of the atmosphere by all world inhabitants (Carbon footprint)

The FairClimateFund

Mission

- Give small households access to the carbon credit market and to potential clients in industrial countries
- Generate new funding for investments in renewable energy projects.

Innovative financing mechanism: provide access for the poor to commercial carbon credit markets

Key elements (1)

FAIR 
CLIMATE
FUND

- **Social venture/Business approach**
- **ICCO brings in partners: India, S.Africa**
- **Small scale CDM projects + Gold Standard**
- **investing and trading**
- **credits with a 'name and a face'**

Key elements (2)

FAIR 
CLIMATE
FUND

- Fair-trade principles/cost price based
- sales on the Voluntary market
- clients: households, municipalities and companies
- website www.fairclimatefund.nl

Benefits for households

FAIR 
CLIMATE
FUND

- **Extra funding for sustainable energy**
- **Less dependency on fossil fuels**
- **Positive impact on health**
- **Biogas: less firewood needed**
- **Extra time for economic activities**

Partners

FAIR 
CLIMATE
FUND

- Local partners of ICCO: ADATS, NOVA
- Windunie Trading BV, Greenchoice BV
- TNO for automated monitoring
- Fair & Sustainable B.V./ICCO as initiator

Werk mee aan een beter klimaat!

Klimaatverandering, de media staan er vol over. We weten dat autorijden en het vliegtuig nemen slecht is voor het milieu. Maar wat kunt u doen tegen de opwarming van de aarde? Behalve besparen op uw energieverbruik nemen groene energie kopen, kunt u nu ook uw CO₂-uitstoot compenseren.

Hoe?

Heel simpel: bereken uw CO₂-uitstoot met de [calculator](#) en compenseer uw uitstoot door te investeren in energieprojecten in ontwikkelingslanden. Het FairClimateFund werkt daarvoor samen met

[ICCO](#), [FairClimate](#), [TNO](#), [Greenchoice](#) en [Windunie](#).

Investeer in een eerlijk klimaat en laat tegelijkertijd de mensen in ontwikkelingslanden een inkomen verdienen.

Wist u dat...

in 2007 de CO₂-uitstoot van de gemiddelde Nederlander 11.000 kilo was? Bijna drie keer zoveel als het wereldwijde gemiddelde!

TNO: Automated monitoring

**CLIMATE
FUND**

CERTIFICAAT

THE FAIR CLIMATE FUND THANKS

The Minister for Development Cooperation, Mr. B. Bosman, for compensating 11 ton CO₂

Project | Baobab Project, Burkina Faso

In the Baobab Project, over 1000 people are encouraged to plant trees and to use them for their daily needs. The corresponding CO₂ emissions give a strong incentive for the environment and the health of the local population. By changing their lifestyle, the local population is reducing "global warming" - the local is decided and consistently less than the global one released into the atmosphere. Since CO₂ emissions are reduced by 10%.

Results

FAIR 
CLIMATE
FUND

- **Purchase of carbon credits from 18,000 bio-digesters (CDM) and improved cooking in South Africa (pre-GS)**
- **CER's: 48,000 tonnes per year**
- **VER's GS: 25,000 tonnes per year**
- **Sales EUR 35,000**

Conclusion

FAIR 
CLIMATE
FUND

- **FCF as innovative financing mechanism with double positive impact: climate and poverty reduction**
- **YOU: start, compensate your CO₂-emissions AND invest in income generation for the poor!**
