Debate on Energy and Development-Day 2010

How can modern energy for
developing countries be financed?

Tech Transfer -> Renewable Energy

- Definition / scope of TT is unclear
- It's all about the software/orgware
- Make it business driven
- Engage with recipient country (political commitment)
- Twinning between countries

Session 2

- Less standards, more standardisation
- Open audit process, transparency
- Demand side:
 - Platform for PR-value
 - Tax deductible
 - Opt out instead of opt-in

Session 3

- Long term commitment CDM will be there
- Simplification of baseline
- World-wide cap and trade (in the long term)
