

Results Morning Debate

Debate on Energy and Development-Day 2010

How can modern energy for
developing countries be financed?

Bottlenecks

CER benefits for Africa

- Difficult, because widespread consumers and less organised environment
- Decrease monitoring cost of projects
- Political risk longer term (>3 yrs)
- Lacking data / baseline
- Low industrial activity / 'clean' baseline
- Policy / research / training infrastructure

Breakaway Session 1

Future of CDM on enabling small scale technologies

- Simplify methodologies for micro-scale technologies
- Price development
- Specific support mechanisms for high priority technologies
- Recognition of all carbon impacts (non-renewable biomass)

Breakaway Session 2

- Benefits of CERs Landfill: sanitation, jobs, environment; Cookstoves: health, wood finding burden, faster cooking
- Measure Development Impact
- Premium on CERs from LDCs?

Breakaway session 3

- Development agenda polluted by climate change agenda
- Why should developing countries leapfrog in technology (focus on needs)
- Polluter Pays principle
